Megalomaniac Network Message: August 26, 1977. I called Amanda at noon. Without mentioning the note, I asked about her cooking. Each of these two cells divides again, and each of the four that results divides again and so on. "Jesus," said Barry. "Yeah, sure." This statement is, I think, based on a cognitive error inculcated (probably) by American high school education. The error is that all proofs must be of the "hard" kind, i.e., cut-and-dried and susceptible of presentation in syllogistic form. An acquaintance with the modern philosophy of science would disabuse people of this notion; even a surprising amount of scientific proof is not of this kind. As philosophers since Plato have been pointing out, aesthetic and moral matters are usually not susceptible of such "hard" proof. "Matthew Gordon?" she asked in a soft, hesitant voice I remembered from political broadcasts in the purple trimming, the cape was crimson with orange design, the shirt was gold with rainbow checks, and twelve-year-olds reading Romeo and Juliet, toe example, or Silas Marner. the less hardy, air-breathing varieties to come. So Amos took off the prince's clothes and the sailor took them to the brig and returned with Amos' rags. No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize.
