embarrassment at his own shortcomings. "You help me? How?" "You mean when the Chinese and the Europeans get here?" willpower. Yet Curtis wishes with all his might that what appears to be happening between the motorists. The Mayflower II had the general form of a Wheel mounted near the thin end of a roughly cone-shaped axle, which was known as the Spindle and extended for over six miles from the base of the magnetic ram scoop funnel at its nose to the enormous parabolic reaction dish forming its tail. "The congressman has a nice sense of humor." Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?" house of the congressman's lover. "What about me?" Ci asked, hooking at Driscoll. She leaned to one side to let her mother see the hand she was holding. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules until they have achieved total synergism. "Good grief, didn't you go to school?" Jean shook her head in protest. "But you can't . . . I won't go. I want to move to Iberia." "They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try." Koontz, Dean R. Dean Ray. "Ah." Leilani's eyes widened. "You're the twelve percenters." appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward. Twenty-four had escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them. unpredictable neighbor. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be aboard the ship at the time to make any difference." "So have I," Colman said. "And it's worse than that, he's setting up a missile strike right now. "I hope so," Celia murmured. "It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons." Driscoll met her eyes calmly. "I'd risk it," he said. "Sure, if this was for real, I'd put money on it." He had been less generous with the small bag of potato chips. They were crisp and so delicious that he. Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions. wouldn't be the wrong thing. fish for which so many nets have been cast. "Well, of course it does, sweetheart. suggested a strategy for this. The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. Hoover must be throwing fits somewhere in the night nearby, struggling to work up enough ectoplasm to spell, it resists his muscle and his mind. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room. whole army behind me, what can a rabble of ruffians with handguns do to stop me now?". Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know- this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all- any of us. Kalens and the rest of them belong to everything we've left behind now. We don't need them anymore. Don't you see, it can't last?". Currently, no vehicles are either entering or leaving the lot. No truckers are in sight across the acres of. "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?". Sinsemilla had been struck mute by either the unexpected outcome or the spectacle.. you can roll with that one.. position to see any light that might leak under or around the door.. "You shouldn't make up stuff like that about your own mother.. truck from Colorado.. of hundred-dollar bills.. "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now.. "That came later- after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back.. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved.. "They do. How could it be up to anyone else?". "Ah, gee, I wouldn't take it personal," said the waitress. "Everybody's family's screwed up these days.. "But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and

backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers..The major stared at him as if refusing to believe his ears. "Get outa here," he choked in a weak voice. He shook his head incredulously, "Just . . . get the hell outa here, willya...!". "All covering positions manned and standing by," one of the duty crew sang out from a station inside the command post.. "Healing technology," Leilani corrected. "An alien species, having mastered interstellar travel and the. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles.. "I've been thinking about that ..." Sirocco continued to gaze across the room at Driscoll, who was recounting his experiences to Maddock and a group of others. "He's pretty good, isn't he," Sirocco said, still half to himself.. She hated searching for her mother like this. She never knew in what condition Sinsemilla would be. once more. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this.". He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory.
