"So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out.".5. Female friendship?Fiction..Continuing to snarl soundlessly at the mirror, the stranger employs a fingernail to pick between two teeth..her contact with anybody made no sense. Veronica said that Celia hadn't volunteered any more information and that she hadn't pressed Celia for any, which Colman believed because that was the kind of relationship he knew they had-much like that between himself and Sirocco. But now that the immediate panic was over and everybody had had a breather, he was curious..Kath closed her eyes gratefully for a moment, and then turned to speak to Veronica, Adam, Casey, and Barbara, who were off-screen. "They've found Steve, He's all right."Colman thought about the briefings he had attended recently on the offensive tactics for seizing key points on the surface of Chiron in the event of hostilities, and the intensive training in antiterrorist and counterguerilla operations that had been initiated. The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public..door. If they had been genuine riders of the purple sage instead of computer-networking specialists or."So everyone becomes a law unto himself," Merrick concluded,,shouting. "FBI! FBI! Freeze, freeze, freeze!".Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence-mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later.".Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. 110w can you break out of it?". "Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. They've got more than enough to do." He looked at the Terrans. "This is Hoover. He runs the place. Don't pay too much attention or you'll end up buried in junk up to your eyes.".While the red and then the purple dust of twilight settled, Noah remained in the three-bedroom suite,."So, is this fine young fella the Jay you were telling me about?" When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling.. "What are you suggesting?" Wellesley was gripping the arms of his chair as if about to rise to his feet. "Withdraw that accusation at once!".Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not.".Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl."It wouldn't worry me if you burst into flames." The robot chuckled raspily..The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed..Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Sterm, and she can't make a move without being watched. She could be in real danger, Steve. She hadn't been Leilani Klonk when she hurried from this room..since..Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory..Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted.."I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before.".Sinsemilla wasn't in the living room.. "That has to give us the rest of the ship and the surface," Swyley said. "If the Army gets its act together and grabs Sterm before he gets a chance to head this way, then we might not have to go in there at all.". "Well, maybe I've padded your bill to make up for not keeping that ten thousand," he said, though he. "All right then," Cromwell challenged. "Now what do you think would make you walk like that when people shouted

His tail lowers further,.The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows."That's one of my sisters playing the cello," Murphy informed him. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..house, onto the front-porch roof, and glances back.."Yes, we know that," Quarrey agreed. Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it..survival, he must forget, at least for now, that particular terror, that unbearable loss.."The calculations and simulations have been verified?" Sterm said, looking at Gaultiz..The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going."It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think". "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "Tm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..information than all five human senses combined, so he doesn't nudge her out of the way..and terrifying than the teeth..Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment."I didn't say that. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down

to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislau had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..ricocheted across Utah with the unpredictability of a pinball. Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Sterm could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." "It's getting to you too," she whispered tightly.
