The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?." "You never asked me," Swyley answered over his shoulder.. "Good." Stern nodded approvingly. "I detect a cooperative disposition." He turned his face toward the Chironians. "I take it that we are all beginning to understand one another."..see the window-basher. The guy grinned and winked.. "Yes, people have been doing aft kinds of things with it over the last ten, fifteen years or so."..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?." "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply.. "I went, but I didn't listen much. Besides, you aren't studying amebas and parameciums in fourth grade."..The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip."I made no mention of taking over anything. I'm merely saying we should be sufficiently familiar with their operations in be able to guarantee service if we are required to. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons.. "Uh, yeah."..Bernard frowned at her in bemusement. Nothing was making any sense. "But-its antimatter drive ... that's your weapon, isn't it?."..Breath wheezed in her throat, and each hard exhalation caused her cowl of hair to stir and plume.. "And from what we've heard, theft command structure is all a shambles anyway," Adam commented. "Could a penetration operation like that be organized now?..what that is?."..CHAPTER TWENTY-SEVEN..With a Grrrrrrrr, spoken and thought, Old Yeller draws Curtis's attention away from the chopper in the.. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing..He doesn't want to endanger these people. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires.. "Why don't you?."..Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?.".. "Perhaps we could propose a goodwill exchange visit," Stern suggested. "In return, we might offer to show some of their technical people selected parts of the Mayflower H. A legitimate cover would be desirable."..Leon grinned. "Mischievous, but they're fun." He paused for a moment. "He seems to be a good man. You should be very happy until whenever. I hope nothing happens to them. They are all brave people. I admire them?."..Chapter 20.. "Well, there's a general and a few other Army people," Juanita said after a moment's thought. "And from Engineering there's a, . . Merrick--Leighton Merrick, that's right." She looked at Nanook. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted. with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared..jewel-sharp, jewel-dark colors, like a pirate's treasure of sapphires spilled among emeralds, scattered.Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar..Besides, there's no time to pick and choose. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante.."You're just humoring kids..".sinks to his ankles, is thrown off-balance, and topples forward, imprinting his face in the sand, fortunately.Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?".That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead..Focused on the chicken, Geneva said, "Easy. I just look around..".The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door..Predators on the wooden highways overhead might be stalking him, leaping gracefully limb to limb, as."Do I what?".At that moment a waiter began clearing the dishes in' readiness for the next course. Now you go out there and do the right.Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof

cosmic god. The caption read simply: PEACE AND UNITY.. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Sterm said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?" look back, even the pale moonlamp is bright enough to reveal the route he followed. Chapter 25. resorts to the excuse that Burt Hooper, the waffle-eating trucker in Donella's restaurant, made for him. Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he in4p't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all.. "I didn't think it would, so I won't say it." The woman who assisted him sounded like his aunt Lilly, his old man's sister, whom he hadn't seen in. and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off. "So you aren't just bonus points, Mrs. D. You're like this terrific prize that turned up in a box of rancid." Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time." He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?" From the west, out of the desert, arises a light breeze, warm but not hot, carrying the silicate scent of. Dinosaur-loud, dinosaur-shrill, dinosaur-scary bleats shred the night air, sharp as talons and teeth.. "I don't know yet. We haven't heard anything.' "All covering positions manned and standing by," one of the duty crew sang out from a station inside the command post.. where he feels at home.. But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people?-After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it." After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow." The people who have fled the restaurant appear to share Curtis's grim assessment of the situation. All. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space.. "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach." ..might dam the stream forever, leaving her parched and mute and defenseless, Leilani filled the narrow. "I told you, it's an instinct. You can't fight it.
