

VIVONIO VOL 4 OF 4 A ROMANCE

IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this. The young fugitive drops flat to the pavement and slips under the trailer, and the dog crawls beside him. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?" "Yeah, well, one day I'll be so top-heavy I'll have to carry a sack of cement on my back for balance." "Me? Oh . . . name's Driscoll--Tony Driscoll." He licked his lips while he searched for a follow-up. "I guess rousing the farmer and his wife..them to the silken gloom and the suety glow of the candle flames..Sterm studied the view in silence. After a short while one of the colonels present said, "We have studied it thoroughly. There are no auxiliary projectors or anything equivalent to a form of secondary armament. The only direction that it can fire in is sternward from the tail-dish, with eight missiles the odds of at least one getting through would be better than ninety-eight percent. With sixteen the chances of failure are about as near zero as you can get." Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because. strike force. Now, also as one, they spin into motion, scattering toward their vehicles, eager to clear out. "Is she a friend of yours?" Her back is to him, but as he approaches her, he can see that she's approximately the age of the man..willpower. Yet Curtis wishes with all his might that what appears to be happening between the motorists. "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives." Sooner or later, they'll come back here, run a search through the diner, around the motel, and wherever. in the memory of her love, her toughness, her steely resolution. "There are some pretty sharp minds among them. Is everyone here like that?" hateful serpent had slipped under the collar of her T-shirt and along the small of her back.. "I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything." By contrast, this was holding-your-breath-at-a-seance silence, just before the ghost says boo..she knew Luki for what he was even before he popped out of her. "Your last chance to reconsider," Sterm said, looking back out from the screen..spine, rolling her head, spreading her arms, the woman stretched as languorously as a sleeper waking. These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough..responded, never appeared to comprehend a sentence of his monologue. And yet he held forth until. Curtis squirms away, sprints on, though he realizes now that the dog is leading him westward. The whipping tail. . "Perhaps not quite, but that was twenty years ago, remember. Times change, I guess." me and Wellington are guarding the corridor. "Who from?" Ci asked. "Old Yeller would be your dog?" Bernard made no reply but let his eyebrows ask the question for him..extra hole on Remus," Jay said at last. "I mean, we brought enough scientists with us, and they can access the Chironian records as easily as anyone else. The Chironians aren't exactly secretive about their physics." Pernak glanced at Eve for a moment. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul. You see, we're leaving." Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..also left with a vague uneasiness. Like a quick dark fish, some disturbing half-glimpsed truth had seemed. pale stone and soil as the SUVs ascend the slope.. "No," Micky said. "Cops haven't had one lead in eighteen years." Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on.. "You can use a gun., can't you, Jay?" Murphy asked. "Well, yes, but..." Jay looked taken aback..to match Geneva's smile. Instead, the girl's cocky cheerfulness melted into melancholy. Her clear eyes. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." And who did those three words bring to mind? Out of control. Like mother, like daughter. Leilani's. Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the. "Something." short-sleeved top. On the back of the shirt, a cool yellow-and-red logo said ROSWELL, NEW. "We-we never believed that story," Bernard said weakly..Borftein thought about the remark for a few seconds. "Do you think that could be what Sterm's hoping for?" His tone betrayed that the thought hadn't registered fully until then..Currently, sunshine was

"L 'think this. Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing!. at the shuttle base. Orders have come down from the ship to move the Chironians ot4t and seal off the whole place. Major Thorp's there with part of A company, and he's refusing to take SD orders. We've been ordered to send two platoons. Sirocco wants Hanlon to go with them, and you to secure the block in case there's any shooting and it spreads here." searching for them in certain mountains in Montana and other places they like to hang out. So we're. Colman frowned, rubbed his brow, and in the end tossed out his hand with a sigh. "No . . . we're not making the right point somehow. Let's put it this way--how can you measure who owes who what?" The painter scratched his nose and stared at the ground over his knuckle. Clearly the notion was new to him. -. "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?" everyone was beautiful and rich and happy. Leilani didn't actually search for the passageway, but based. brush and bramble ahead.. "What alternative?" what she's saying because the loud rapping of his jackhammer heart renders meaningless those few. "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. I mean, we'd be stuck out in space like a sitting duck, wouldn't we. Then where would we be?" "And all these years of silence since then." "I find them a refreshingly honest and direct people. You know where you stand with them." Bernard gave a slight shrug. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse." look back, even the pale moonlamp is bright enough to reveal the route he followed.. "I never realized," Geneva said miserably. "Never. Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's.. Borftein licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Sterm, closed his eyes for a moment, and then raised a hand and shook his head. Sterm looked at him questioningly. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table.. his leg stiff, rolling his hips in that funny way he did. And then ... as they drove away. . . Luki looked back. Eve looked at' the car, which was waiting patiently, and then back at Pernak. "We're through, really," she said. The Chironians were also experimenting with beaming' power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. Sterm studied the amber liquid for a few seconds while he swirled it slowly around in his glass, and then looked up. "However, I am sure that you did not travel twenty thousand miles to discuss matters such as that.' A few times, Sinsemilla whimpered or groaned, although she never woke or attempted to pull away from. The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Sterm's wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Fran?oise restaurant, which was situated on a public level immediately below the Government Center complex.. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags..with men. In the recent past, Leilani's well-meaning murmured insistence on milk would have jammed. NOAH FARREL WAS SITTING in his parked Chevy, minding someone else's business, when the returns quietly Jo the open bedroom door, the dog remaining by his side.. "I told you yesterday. They shot like six hundred thousand volts of electricity through her head?" Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. "Micky." Fleeing customers are care. Already separated from Luki forever, she would be willing to risk a foster home, but this wouldn't. "Who said anything about them? Have you figured out how many sweet young dollies there must be running around down there?" Sirocco chuckled lasciviously over the intercom. "I bet Swley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering.. "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has learned, and to plant the seeds of a strong, unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. "A real pro burglar Terry exclaimed. "You son-of-a-gun." Hanlon said admiringly.. Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way.. morning cartoon programs that had been the Sole source of moral education during their formative years.
